WORK EXPERIENCE

Rambler&Co **Moscow, Russia**
AI Platform Lead *Nov 2025-Present*

- Conceptualized a unified conversational platform that consolidated siloed portal services into a multi-agent interface, positioning the product to capture **3M+** target users by delivering a seamless, cross-functional user experience.
- Authored technical PRDs and product roadmaps to translate a complex LangGraph orchestration architecture into actionable OKRs for **6** direct and **~20** matrix reports.
- Spearheaded the design of a real-time streaming response architecture for news agents, compressing perceived latency by **40%**—reducing response times from 10 to 6 seconds—to maximize core user engagement and retention metrics.
- Directed cross-functional lifecycle collaborations across engineering, product, and editorial teams to accelerate production asset generation by **2x** through the rollout of a custom LLM CMS.

CVSCORE.PRO **Moscow, Russia**
Founder & Head of AI Platform *Jan 2024-Present*

- Architected and deployed a suite of enterprise-grade, agentic SaaS prototypes from concept to functional demo to showcase generative AI capabilities and attract B2B advisory clients.
- Formulated the product strategy and Go-to-Market (GTM) narrative for an automated, LLM-based applicant screening prototype, demonstrating measurable efficiency gains for target small business workflows.
- Engineered highly auditable, retrieval-based RAG architectures that eliminated hallucination risks and established strict compliance frameworks for sensitive corporate data environments.
- Evaluated critical build-vs-buy criteria across major LLM providers and infrastructure layers to successfully transition a custom workspace tool from an internal marketing agency application to a public-facing product release.

VTB Bank **Moscow, Russia**
Head of Generative AI *Aug 2024-May 2025*

- Governed the end-to-end development of an enterprise RAG-based classification platform, increasing processing accuracy by **75%** while eliminating significant manual operational triage workloads.
- Systematized strict enterprise AI risk frameworks and data privacy policies across the platform infrastructure to ensure total auditability across customer-facing banking workflows.
- Deployed an LLM-assisted session clustering tool that shortened the negative user feedback and problem discovery cycle by **50%** to drastically improve branch customer satisfaction.
- Collaborated with business, data science, and security teams to build LLM workflows that accelerated digital content delivery **3x** while achieving a **98%** reduction in stylistic errors.

Balance Platform **Moscow, Russia**
Product Leader (Leasing SaaS Platform) *Oct 2023-Jul 2024*

- Overhauled the end-to-end platform release delivery model for a revenue-generating SaaS product, tripling deployment frequency and shortening product time-to-market by **15-20%**.
- Expanded technical delivery capabilities by recruiting and scaling a **22-person** engineering team, filling **~50%** of core product engineering vacancies within 2 months.
- Re-architected core platform systems and the central data layer, boosting overall platform adoption metrics and individual user productivity by **30%**.

Mercedes-Benz Mobility **Moscow, Russia**
Digital Transformation Manager – Financial Services *May 2018-Oct 2023*

- Delivered an online financial ecosystem and mobile calculator product, driving a **25%** spike in user conversion rates and winning the Bronze Tagline Award.
- Negotiated a **$400K** program budget and roadmap alignment across engineering and business units to successfully launch a scaled digital leasing system.
- Enforced strict adherence to data governance, financial compliance regulations, and GDPR standards across all self-service financial application products.
- Optimized regional B2B partner distribution productivity by **~80%** by deploying tablet-ready applications that eliminated manual, desktop-bound workflows.

BINBANK Digital **Moscow, Russia**
Technical Product Manager *Apr 2015-Apr 2018*

- Guided the product lifecycle and technical launch of a brand-new mobile SME banking platform, securing a **Top-7** market position within the region.
- Restructured retail mobile and internet banking infrastructure alongside engineering leads, achieving **Top-1 / Top-2** competitive market positions.

EDUCATION

HSE University **Moscow, Russia**
Master's Degree in Business Informatics
Engineering Degree (CAD)

SKILLS, CERTIFICATIONS & INTERESTS

AI Architecture & Systems: RAG Pipelines, Multi-agent Systems, LangChain, LangGraph, LLMOps, Vector Databases, Context Windows, Cloud & Infrastructure (GCP), Distributed Systems Design.
Core Product Frameworks: Product Requirement Documents (PRDs), Objective & Key Results (OKRs), Go-to-Market (GTM) Strategy, AI Risk Frameworks, UX/UI Collaboration, Product Metrics Tracking, Product Lifecycle Management, Cross-functional Leadership.
Languages & Development: Python, SQL, JavaScript, TypeScript, FastAPI, API Development.
Professional Certifications: Generative AI Leader (Google, 2026) | Fundamentals of Agents (Hugging Face, 2025)
Interests: Psychology of emotion control, authoring AI-native educational applications, tech hackathons.
