EDUCATION

Conestoga College Institute of Technology and Advanced Learning — **Waterloo,On**
Software Quality Assurance and Test Engineering — *May 2025 – Apr 2026*

Conestoga College Institute of Technology and Advanced Learning — **Waterloo,On**
Computer Applications Development — *May 2024 – Dec 2024*

Silver Oak College of Engineering and Technology — **Ahmedabad, In**
Bachelor of Engineering Technology | Information Technology — *Aug 2019 – May 2023*

WORK EXPERIENCE

Equitable Life of Canada — **Waterloo, ON**
Technology Specialist (Co-op Developer) — *Jan 2026 – Apr 2026*

- Developed and enhanced enterprise financial applications using Angular, React, .NET, SQL, JavaScript, HTML, and CSS, resolving 2–3 production defects per sprint across retirement and savings platforms.
- Built the front-end architecture for a single-page React application with 7 navigation sections using TypeScript, Vite, and internal component libraries, supporting new digital insurance workflows.
- Diagnosed and resolved production pricing issues by debugging UI functionality and updating database logic, preventing inaccurate pricing displays for customer-facing insurance products.
- Supported bi-monthly production releases by participating in code reviews, testing validation, and deployment approvals alongside 3 developers, 2 QA engineers, and 2 business analysts.
- Partnered with product and design teams to build scalable UI components for customer-facing applications.

CreArt Solutions — **Ahmedabad, India**
Software Engineer Intern — *Jan 2022 – Mar 2022*

- Developed and deployed a Django-based web application that automated secure email workflows, reducing manual communication processes by an estimated 30%.
- Improved backend reliability by implementing automated error handling for email header failures, reducing processing errors by an estimated 60%.
- Collaborated in Agile development cycles to support Git workflows, unit testing, and CI/CD deployment processes, improving release efficiency by an estimated 70%.

PROJECT EXPERIENCE

Clinic Appointment Booking System — **Waterloo, ON**
C#, ASP.NET Core MVC, SQL Server, Entity Framework Core — *Sep 2025 – Dec 2025*

- Built a full-stack healthcare platform that streamlined patient registration, clinician management, and appointment scheduling workflows.
- Designed SQL databases and implemented CRUD functionality to securely store, retrieve, and update patient records.
- Developed dynamic Razor Views with validation features that improved booking accuracy and user experience.

God's Eye AI Surveillance System — **Ahmedabad, India**
Python, OpenCV — *Jan 2022 – Feb 2023*

- Built a computer vision application that analyzed real-time CCTV footage to detect and track individuals using image recognition algorithms.
- Developed an automated alert system that triggered notifications when identified matches were detected, improving monitoring efficiency.
- Collaborated with a team of developers to prototype the solution during a hackathon within 3-4 months.
