EDUCATION

Harvard Graduate School of Education **Cambridge, MA**

Master's in Education (Ed.M.) : GPA: 4.0 *Graduation Date: May 2025*

- Program: Learning Design, Innovation, and Technology
- Relevant Courses: Learning Design for All (2024/FA), Ed Tech Advanced Design Studio (2025/SP)

Mount Holyoke College **South Hadley, MA**

Bachelor of Arts *Graduation Date: May 2024*

- Honors and Awards: Global Competence Award, Awarded in 5/17/2024, cum laude, Awarded in 5/19/2024

PROJECT EXPERIENCE

MIT Professional Education

GenAI-Powered Food Delivery Sentiment Analysis *Jan 2026*

- Built an automated feedback intelligence pipeline using Google AI Studio and LLM-based prompting to analyze Uber Eats customer reviews, classifying sentiment (Positive, Negative, Neutral) and generating standardized operational tags and recommended business actions for faster decision-making.
- Designed and iterated structured prompt frameworks (Zero-Shot, Few-Shot, and Chain-of-Thought) to evaluate model performance across accuracy, consistency, and output quality; identified optimal prompting strategy to improve reliability of customer insight extraction.
- Transformed unstructured customer feedback into actionable insights by mapping model outputs to operational categories (delivery experience, food quality, packaging, app usability), enabling stakeholders to prioritize product and service improvements at scale.

MIT Professional Education

Loan Default Prediction *Dec 2025*

- Analyzed pre-built KNIME dashboards and visualizations to uncover behavioral and financial risk patterns, developing data-backed hypotheses around borrower characteristics influencing loan approval outcomes.
- Translated analytical findings into structured recommendations for banking stakeholders, identifying key approval factors (credit behavior, repayment capacity, and demographic indicators) to support more informed and consistent lending decisions.

MIT Professional Education

Hotel Booking Cancellation Prediction *Nov 2025*

- Analyzed RapidMiner visualizations for a hotel booking cancellation case study to identify booking behavior patterns and develop hypotheses on drivers of cancellations (lead time, customer segment, pricing, and seasonality).
- Synthesized insights into actionable recommendations for INN Hotels Group, proposing data-driven refund and booking policy adjustments to reduce cancellation risk and improve revenue predictability.

Duck 'n Go

HGSE *May 2025*

- Co-developed an interactive exploration application that surfaces location-based historical narratives, enabling users to engage with community stories and underrepresented perspectives through a structured discovery experience.
- Collaborated on product design and content framework to organize archival and cultural data into accessible digital journeys, improving user engagement and promoting inclusive storytelling within local communities.

ArtEval made with Playlab.ai **City, Country**

AI Project *March 2025*

- Built ArtEval, an AI-powered platform that enables K-12 creative-subject teachers to generate inclusive, standardized, and personalized assessment rubrics, reducing subjectivity while adapting evaluation criteria across districts, grades, classrooms, and individual learning needs.

SKILLS & INTERESTS

Skills: Scratch, HTML, CSS, JavaScript, AI, WYSIWYG, Website Builders, Databases, Canva, Knime, Rapid Miner, Microsoft Office (Excel, Word, PowerPoint)
