WORK EXPERIENCE

Technofy Solutions LLC | Irving, Texas *February 2026 – Present*

Project Analyst

- Authored 10+ technical reports and SOPs standardizing validation workflows, improving audit readiness and documentation consistency across quality-driven operational initiatives.
- Reduced implementation errors by 30% by developing technical specifications, validation requirements, and process documentation for complex laboratory and operational workflows.
- Reviewed 100+ deliverables submitted by web development teams against client requirements using structured checklists, coordinating with a cross-functional team of 5-7 across QC and project leadership to resolve discrepancies before delivery.
- Developed onboarding templates and tracked project documentation across Excel and SharePoint, improving consistency of process knowledge transfer and record accessibility across the team.

Women of Connections Ministry Inc | Richmond, Virginia *May 2025 – February 2026*

Quality Assurance Analyst

- Executed 50+ Quality Assurance audits on complex clinical and operational datasets, strengthening data integrity and establishing validation protocols aligned with regulatory and GCP compliance standards.
- Consolidated 5,000+ clinical and operational data points into the NICU 2025 Impact Report, supporting accurate specimen and outcomes reporting across clinical teams.
- Developed digital filing architectures and compliance procedures supporting 1,000+ records, improving chain-of-custody documentation and consistency across large-scale datasets.
- Reduced data inconsistencies by 40% by training staff on standardized research protocols, SOP adherence, and cross-functional quality management procedures.
- Collaborated with 5+ cross-functional stakeholders to review research documentation and reinforce protocol adherence across data and sample-handling workflows.

Jeeva Clinical Trials Inc. | Manassas, Virginia *September 2024 – December 2024*

Clinical Research Intern

- Performed Quality Assurance reviews and remote monitoring support on 200+ clinical datasets, maintaining data confidentiality and ensuring alignment with GCP standards and protocol compliance requirements.
- Increased clinical trial execution efficiency by 15% by applying R-based data analysis to decentralized clinical trial workflows and patient recruitment optimization.
- Authored a 25-page white paper and competitive analysis on decentralized clinical trials (DCTs), evaluating regulatory frameworks relevant to trial operations.
- Conducted independent research on 5+ patient recruitment strategies, developing technical reports and protocol documentation to support clinical planning.

Rapture Biotech International Pvt. Ltd. | India *July 2022 – November 2022*

Laboratory Technician

- Executed 150+ biochemical assays, including SDS-PAGE, agarose gel electrophoresis, and protein extraction/quantification (Lowry/BCA method), maintaining 98% protocol adherence and supporting accurate sample characterization.
- Performed plasmid and genomic DNA/RNA extraction, PCR amplification, and UV-Vis spectrophotometric quantification within sterile laboratory environments, maintaining detailed documentation and supporting research data integrity standards.
- Conducted ELISA and Western blotting for protein/antigen detection, and purified biomolecules via ion-exchange, gel filtration, and HPLC chromatography, supporting assay development and analytical workflows.
- Utilized AutoDock, NCBI BLAST, and GenBank to analyze genomic sequences and simulate drug-target interactions, supporting 3+ internal R&D and structural biology initiatives.
- Collaborated on multi-step laboratory experiments, troubleshooting technical deviations and reinforcing adherence to SOP-driven research and quality control procedures.

EDUCATION

Professional Science Master's (P.S.M.) in Bioinformatics Management | George Mason University

December 2024

Bachelor of Science (B.S.) in Biotechnology Honors | GITAM University, Visakhapatnam, India

CERTIFICATIONS

- Good Clinical Practice (GCP) Certification — NIDA Clinical Trials Network | Completed August 2026, Valid through August 2029

SKILLS & INTERESTS

Quality Control (QC) | Quality Assurance (QA) | Laboratory Techniques | Biochemical Assays | ELISA | Western Blotting | SDS-PAGE | Agarose Gel Electrophoresis | DNA/RNA Extraction | Plasmid Isolation | PCR | UV-Vis Spectrophotometry | Chromatography (HPLC, Ion-Exchange, Gel Filtration) | Protein Quantification | Enzyme Assays | Microbial Culture Technique | Sample Processing | Good Clinical Practice (GCP) | Clinical Research | Clinical Data Management | Protocol Compliance | Regulatory Documentation | SOP Development | Data Integrity | Chain of Custody | Patient Recruitment | Research Documentation | Clinical Operations | Validation Protocols | Cross-Functional Collaboration | R Programming | Bioinformatics | Genomic Analysis | NCBI BLAST | GenBank | AutoDock | Workflow Optimization | Process Improvement
