WORK EXPERIENCE

Walgreens **Remote**

Business Data Analyst *Oct 2024 – Present*

- **Evaluated** cross-functional analytical gaps across 8 core corporate initiatives, accelerating timeline delivery to production by authoring modular BRDs, FRDs, and user stories that aligned engineering output with financial compliance objectives.
- **Formulated** interactive Power BI dashboards using advanced DAX and Power Query, expanding financial operational tracking across 60+ business analysts while boosting internal transaction processing and claims handling efficiency by 18%.
- **Architected** secure Azure data infrastructure (Data Factory, Synapse, Data Lake) to integrate 20+ disparate data sources, resolving enterprise-wide source-of-truth disputes across 3 business units to establish unified data lineage standards.
- **Managed** the transition of legacy financial transactional databases to an Azure SQL Data Warehouse platform, cutting system reporting latency by 35% and scaling self-serve analytics availability by compressing overnight refresh windows from 6 hours to under 4.
- **Enforced** strict corporate data privacy standards and HIPAA-grade governance structures using Azure AD RBAC and Key Vault, passing the internal data security and compliance audit on the first review to secure policyholder financial accounts.

Bytes Technolab Inc. **India**

Data Analyst *Sep 2021 – Sep 2023*

- **Systematized** cloud ETL frameworks across Informatica PowerCenter, Talend, and Snowflake to orchestrate 100+ weekly production jobs, shrinking engineering processing times by 40% while capturing $6K in annual infrastructure cost reductions.
- **Designed** and performance-tuned an AWS Redshift enterprise warehouse managing 2 TB+ of operational and financial transaction history, implementing distribution and sort key optimizations that accelerated analyst query runtimes from minutes to seconds.
- **Analyzed** transactional behaviors using statistical modeling and machine learning techniques on AWS EC2, mitigating financial leakages by reducing fraudulent payouts by $12K annually via predictive models integrated into the review pipeline.
- **Automated** programmatic Python and SQL data pipeline connections between Salesforce ERP applications and underlying operational ledgers, cutting manual data gathering cycles by 50% to deliver same-day executive financial reporting.

Bytes Technolab Inc. **India**

Business Analyst *Sep 2018 – Sep 2021*

- **Collaborated** with stakeholders across 6 distinct corporate business units during deep-dive interviews, eliminating mid-sprint scope creep by engineering actionable user stories and functional requirements in Jira.
- **Prioritized** strategic product roadmaps and modular feature rollouts alongside technical engineering leads, maximizing post-release user satisfaction to 95% by executing rigid User Acceptance Testing (UAT) feedback protocols across 10+ software builds.
- **Structured** automated Power BI dashboard pipelines to track near real-time operational and procurement metrics, reducing leadership response latency to fast-moving market changes by 25%.

EDUCATION

DePaul University **Chicago, IL**

Master of Science in Business Analytics

SRK Institute of Technology **AP, India**

Bachelor of Technology in Computer Science Engineering

PUBLICATIONS

Tadikonda, Bala Vikram. "Agentic AI for Closing Gaps in Care: A Conceptual Architecture for Automating Gap-in-Care Workflows," IEEE, 2026. DOI: 10.1109/IEEE.2026.11476134

SKILLS & INTERESTS

Languages & Querying: SQL (Advanced Window Functions, CTEs, Query Tuning, Stored Procedures), Python (Pandas, NumPy, Scikit-Learn), PySpark, R, Bash

Data Infrastructure & ETL: Apache Spark, Databricks, Azure Data Factory, Informatica PowerCenter, Talend

Cloud Warehousing & Platforms: Snowflake, Amazon Redshift, Azure Synapse, Azure SQL Data Warehouse; Microsoft Azure (Data Lake, ADF, Key Vault, Active Directory), AWS (S3, Redshift, Glue, Lambda, EC2)

Business Intelligence & Analytics: Power BI (DAX, Power Query), Looker, Tableau, SSRS, Salesforce, Datadog; A/B Testing, Hypothesis Testing, Cohort Analysis, Churn & Predictive Modeling, Statistical Analysis

Methodologies & Governance: Agile/Scrum, Git, GitHub, Jira, Confluence, BRD/FRD Authoring, Stakeholder Management, QBR/MBR Executive Reporting, Data Lineage & Privacy Standards

Interests: Machine Learning Prototyping, Cloud System Optimization, Technical Writing
