WORK EXPERIENCE

St. Francis College, Brooklyn, NY
Business Analyst (Graduate Assistant) | Mar 2025 - Present

- Increased reporting efficiency by 28% by building automated KPI dashboards in Power BI, Tableau, and Excel, tracking 12+ operational metrics for institutional decision-making.
- Reduced operational delays by 18% by prioritizing requirements with MoSCoW and CATWOE frameworks across 30+ stakeholders through structured workshops.
- Reduced document retrieval time by 35% by restructuring 250+ records using SQL queries and process mapping.
- Partnered with cross-functional business, IT, and operations teams to translate requirements into functional solutions, improving delivery alignment and reducing rework.
- Authored user stories and defined acceptance criteria to align business requirements with technical implementation.

University of Indianapolis, Indianapolis, IN
Business Analyst | May 2024 - Jan 2025

- Increased KPI visibility by 40% by designing Tableau dashboards tracking 8+ engagement metrics for departmental leadership.
- Analyzed 500+ survey responses using SQL, Excel, and Tableau, applying root cause and gap analysis to surface and address engagement drivers.
- Reduced manual reporting effort by 35% by automating recurring workflows with Excel Power Query and SQL.
- Boosted stakeholder participation by 20% by facilitating workshops across 5 departments using PESTLE and CATWOE frameworks.
- Supported User Acceptance Testing (UAT) by validating reports and dashboards against documented business requirements.

Tru India, Mohali, India
Technical Business Analyst | Jun 2022 - May 2023

- Delivered an e-commerce platform (50+ products) with 100% on-time release by managing the end-to-end SDLC using Agile (Scrum).
- Increased sprint efficiency by 25% by managing the backlog, writing user stories, and defining acceptance criteria for 6 developers in JIRA.
- Improved requirement clarity by 30% by authoring 15+ functional specification documents (FRDs) and conducting gap analysis with MoSCoW, SWOT, and PESTLE frameworks.
- Reduced ambiguity and improved stakeholder understanding by designing data flow diagrams (DFDs), process flows, and system visuals in Lucidchart and Gliffy.
- Led UAT sessions to validate system functionality and ensure alignment with business requirements.

EDUCATION

St. Francis College, Brooklyn, NY
M.S. in Management, Concentration in Applied Business Analytics | Expected May 2026

Punjab Technical University, Amritsar, India
B.Tech in Computer Science and Engineering | Aug 2023

PROJECT EXPERIENCE

Credit Card Origination and Onboarding System, St. Francis College
Business Analyst - Academic Capstone | Jan 2026 - Mar 2026

- Improved requirement clarity by 30% by leading requirement-gathering with 8+ stakeholders, applying SWOT, PESTLE, MoSCoW, and CATWOE frameworks.
- Reduced design gaps by 30 to 35% by authoring an FRD with 40+ requirements and designing DFDs, flowcharts, and data models.
- Ensured 100% on-time sprint delivery by implementing Agile (Scrum) with 25+ user stories and prioritized backlog management.
- Conducted UAT to validate credit-approval workflows against business requirements, ensuring accuracy and reducing defects.

SKILLS

BI and Analytics Tools: Power BI, Tableau, SQL, Excel (Power Query), Lucidchart, Gliffy

Project and Collaboration: JIRA, Confluence, Agile (Scrum), Sprint Planning, Backlog Prioritization

Business Analysis: Requirements Gathering, BRD/FRD, User Stories, UAT, Stakeholder Management, Gap Analysis, Process Mapping, DFDs

Frameworks: SWOT, PESTLE, MoSCoW, CATWOE, Root Cause Analysis

Data: Data Cleaning, KPI Development, Data Visualization, Data Storytelling
