STEPHEN LIU

Principal Technical Program Manager | AI & Automation | Product Delivery & Transformation
Seattle, WA | 412-266-0672 | StephenLiu17@gmail.com | linkedin.com/in/stephen-liu-tpm | StephenLiu.me

WORK EXPERIENCE

Alaska Airlines | **Principal Technical Program Manager** | Seattle, WA | Jun 2024 - Present

- **Orchestrated end-to-end program delivery and stakeholder governance** across Data Engineering and AI Operations for a Databricks AI platform, **accelerating retrieval 10x and cutting inquiries by 90%**.
- **Spearheaded technical program execution** for DQX data quality, implementing **risk management frameworks** that **mitigated 73% of upstream anomalies** to **prevent delivery disruptions**.
- **Engineered a program dependency management framework** using automated tracking pipelines and AI agents, **reducing cross-team priority conflicts by 20%** across enterprise engineering programs.
- **Orchestrated multi-team SDLC transformation** across engineering programs, instituting standardized CI/CD frameworks that **boosted deployment velocity by 40%** while **mitigating production risk**.
- **Established enterprise program governance** and operational health models across data products, introducing standardized risk assessments that **increased product health scores by 55%**.

Alaska Airlines | **Manager, BI / Management Consultant** | Seattle, WA | Jun 2023 - Jun 2024

- **Orchestrated technical program delivery** for seat automation, **leading cross-functional stakeholders** to yield **$3M in operational savings** and **cut gate staffing needs by 50%**.
- **Led technical program execution and team operations** for a 7-person analytics group, aligning Agile delivery cadences with enterprise OKRs to achieve a **95th-percentile team satisfaction score**.
- **Engineered a centralized risk management and portfolio tracking model** in Azure DevOps, standardizing requirements and backlog health to **reduce manual program reporting by 80%**.
- **Facilitated cross-functional stakeholder engagement** across 80+ enterprise products, translating complex business requirements into technical SDLC roadmaps to **de-risk platform delivery**.

Nordstrom | **Staff Technical Program Manager** | Seattle, WA | Aug 2021 - Jun 2023

- **Established a multi-team program prioritization methodology** across 25+ cross-functional teams, **improving roadmap alignment and increasing delivery efficiency by 32%**.
- **Increased employee engagement by 17%** by launching targeted HR programs and a communications hub that improved organizational transparency.
- **Propelled internal product adoption by 10%** and **increased platform NPS by 7%** by prioritizing engineering technical debt reduction.
- **Led planning and execution** for five early-career tech programs, aligning business teams to **support 200+ participants with an 85% satisfaction rate**.
- **Partnered with the SVP of Data & Analytics** to translate strategy into operating plans, OKRs, and investment decisions for a **400+ person organization**.

GE Grid Solutions | **Sr. Technical Program Manager** | Seattle, WA | Mar 2020 - Nov 2021

- **Led enterprise-wide adoption of open-source security** across GE's portfolio, achieving **100% adoption** through standardized scanning.
- **Managed a $3.2M product portfolio budget** with **90% forecast accuracy** using Tableau financial reporting to guide investment decisions.
- **Standardized delivery processes across three products**, improving consistency to enable on-time delivery of **$2.7M in product value**.
- **Built a global engineering onboarding framework** with HR and Engineering, **increasing satisfaction by 25%** across an 8,000-person org.

GE Healthcare | **Sr. Business Intelligence Engineer** | Seattle, WA | June 2018 - March 2020

- **Optimized patient care throughput by 10%** across provider networks by developing Power BI dashboards tracking cancellation KPIs.
- **Streamlined cloud infrastructure financial reporting** across management teams, utilizing SQL data pipelines to optimize expenditures.

General Electric | **Technical Program Manager / Digital Technology Leadership Program** | San Francisco, CA | Jul 2016 - June 2018

- **Built a Python, SQL, and Salesforce pipeline** to validate data across $32M+ in opportunities, **reducing weekly processing from 7 hours to 1**.
- **Automated regression workflows** across ERP (SAP) supply chain systems, **reclaiming 3,252 annual hours** and saving $162.8K.
- **Streamlined information architecture** for a supply chain initiative, **securing a 432-hour productivity boost** across manufacturing and inventory.
- **Championed cross-functional supply chain readiness**, executing project timelines to **deliver $100M in hardware on schedule**.
- **Automated $4M in budgeting workflows** by partnering with FP&A and data architects, **saving 120+ hours per quarter**.

PROJECT EXPERIENCE

Schoolintel | **Product Manager** | Seattle, WA | Dec 2025 - Present

- **Architected a 9-agent AI pipeline** automating data transformation, achieving a **95%+ extraction accuracy rate** via evaluation grounding loops.
- **Scaled platform reach** to **1.5K+ Monthly Active Users** by synthesizing highly fragmented district documents into clear school insights.
- **Formulated strict prompt evaluations** and release guardrails, eliminating hallucination risks and automatically censoring sensitive PII data.

EDUCATION

University of Washington | **MS in Information Management – Program Management & Business Intelligence** | Seattle, WA

University of Pittsburgh | **BS in Information Systems & Supply Chain Management** | Pittsburgh, PA

- **Highlights**: AI Champion 2026, GE Above & Beyond Award (3x), Alaska Airlines Spot Bonus (2x).
- **Certifications**: ScrumMaster (CSM), Six Sigma Green Belt, Tableau Certified, Google Project Management, Aha! Product Management.

SKILLS & INTERESTS

- **AI & Data**: AI Agents, AI Platforms, Context Engineering, RAG, GenAI, LLM Evaluations, Data Quality, Information Architecture, KPIs, Governance.
- **Program & Product**: Roadmaps, Requirements, OKRs, SDLC, Agile, Risk Foresight, Release Management, Change Management, Executive Reporting, Prioritization, Product Lifecycle Management.
- **Delivery & Technical Platforms**: Databricks, Azure DevOps, GitHub, GitHub Actions, CI/CD, ERP (SAP), PLM, ETL, Python, SQL, Tableau, Power BI, JIRA, Smartsheet, Confluence.
