WORK EXPERIENCE

Amazon Global Operations Learning & Development (GOLD) **Arlington, VA**

Senior Learning Manager, Global Executive Learning & Curriculum Architecture *2021 – Present*

- Spearheaded enterprise-wide capability mapping and curriculum governance for 1.5M global employees, driving alignment between leadership agendas and business OKRs across complex matrixed business lines.
- Pioneered Amazon's inaugural AI-driven executive curriculum development, achieving a 4.9/5 sentiment score across global executive leaders by deploying human-centered design and iterative LLM-powered simulations in the flow of work, which then became a global model of AI-powered experiential learning.
- Directed end-to-end global L8 curriculum strategy and program operations, leveraging data-driven assessments to drive a 20% lift in targeted capability proficiency and a 4.86/5 sentiment score.
- Architected enterprise knowledge management (KM) systems and content repositories, standardizing global knowledge transfer and accelerating organizational change adoption across cross-functional HR, Product, Ops, IT, and Design teams.
- Operated as a Strategic Learning Partner in whitespace to executive leaders, diagnosing performance gaps, aligning learning products to business priorities, executing learning needs analysis, and solving ambiguous problems.
- Cultivated organizational talent through structured coaching frameworks as a leader and a mentor, securing a 100% retention rate for high-potential talent and advancing 2 direct reports into expanded senior leadership roles within 18 months.

Wiley Education Services **Washington, DC**

Senior Learning Experience Designer - Strategic Learning & Curriculum Lead *2013 – 2021*

- Engineered high-impact curriculum lifecycle management systems, establishing scalable digital and hybrid learning programs across diverse institutional partner portfolios.
- Orchestrated the development and launch of Purdue University's inaugural MOOC, expanding international reach to 2,000+ enrolled learners, positioned as a credential pathway and extended Purdue's brand visibility.
- Applied human-centered design, iterative testing, optimized cross-functional stakeholder collaboration and resource allocation, driving a meaningful increase in learner retention across product, faculty, and operational matrixed teams.
- Guaranteed 100% on-time program delivery and standardized quality assurance by establishing rigorous program operations, risk mitigation strategies, and timeline management protocols.
- Evaluated enterprise capability gaps across institutional partners, translating high-level academic goals into actionable, technology-enabled learning roadmaps.

University of Maine **Bangor, ME**

Curriculum & Instructional Technology Specialist *2011 – 2013*

- Mobilized change-resistant faculty to adopt technology-enabled hybrid models, increasing digital curriculum adoption by 28% across graduate-level academic programs.
- Standardized instructional technology frameworks and reusable multimedia architectures, expanding program delivery reach while operating within limited resource allocations.
- Diagnosed faculty capability gaps and operational performance needs, delivering tailored technology interventions that enhanced instructional delivery across 7 departments.

Bangor Christian School **Bangor, ME**

Curriculum Integration & STEM Educator *2009 – 2011*

- Championed the adoption of a digital educational portal, increasing student engagement and digital curriculum integration across multi-subject academic areas.
- Structured and delivered advanced curricula in STEM and humanities, improving student academic performance benchmarks across targeted student cohorts.

CDC Corporation **Bengaluru, IN**

Enterprise Software Senior Technical Trainer *2006 – 2009*

- Accelerated global software rollout speed by 32%, designing bespoke technical curricula and training architectures for clients across North America, Europe, Asia, and the Middle East.

- Balanced instructor resource workloads and reduced deployment cycles by 47%, creating standardized, multi-modal technical enablement documentation for global enterprise releases.
